

ZH10 导热硅胶 ZH10 Thermal Silicon Pad

技术数据表 Technical Data Sheet

ZH10 is a ceramic particles filled silicone rubber, which is good balance for thermal performance with competitive price and providing 1.0W thermal conductivity. It is used between heat sink and heat generating components. Its ultra soft proper enable filling air voids and rugged surface, and wetting out matting surfaces in order to efficiently transfer heat from components to heat sink.

Typical Applications:

- Information products
- BGA
- Power module
